

2ND ADDENDUM TO FACT SHEET
Permit No. WA-000261-5
Todd Pacific Shipyards Corporation

This is an addendum to the fact sheet accompanying NPDES Permit No. WA-000261-5, which was issued to Todd Pacific Shipyards Corporation (Todd) on September 16, 2002. The following revision is made as the result of a recent change at the facility.

MODIFICATION FOR THE PERMIT

Special Condition S1.A.I on page 5 of the permit will be changed to designate Outfall 002 for wastewater from drydock #10. The new drydock #10 replaces drydock #2 which will be removed from service and demolished.

Drydock #10 is 552 feet long and 124 feet wide, and it will be located on the west side of the facility's Pier #5. Drydock #3 will be relocated to the east side of Pier #5 (see attached site map). Drydock #10 will be laid up on drydock #3 for repairs and modifications. Work not accomplished while in drydock #3 will be contained either within the drydock tanks or pontoon deck. It is expected that drydock #10 will be ready for operation by the end of January 2006.

Special Condition S2.A on page 7 of the permit: The sampling frequency for drydock No. 1 (Outfall 001), No. 10 (Outfall 002), and No. 3 (Outfall 003) will be changed from monthly to quarterly in order to be consistent with the sampling requirements for the permits of other shipyards.

PUBLIC NOTICES

The changes to this permit are considered to constitute a major modification under 40 CFR 122.62. Consequently, the draft permit modification is required to be published for a thirty (30)-day public review and comment period. This modification will be published in the *Seattle Times*. The final modification is contingent upon the outcome of the public review and comment period.
